

HEALTH INSURANCE PLAN AGGREGATOR

CLIENT OVERVIEW

Our client is one of the leading General Agencies in California, US. Our client also acts as an agency that provides a bridge between the carriers and the brokers in offering Health Insurance to California. They offer information on plans, rates, carriers, eligibility requirements for enrolment. Quotes in easy to understand formats are given to brokers and groups.

The application developed handles all functionalities for Third Party Administrator for a wide range of carriers. Our client provides the pricing benefits of a large group pool using the quotes system developed. Quote engine was running in ASP technology and we converted it into a robust self-sustaining .Net application.

KEY REQUIREMENTS

- Design and implement the Windows desktop based Administration modules that automate Operations and Finance work flow functions
- Automates tasks involved in enabling enrolment, termination, invoicing, renewals, accounting, disbursement, and reporting

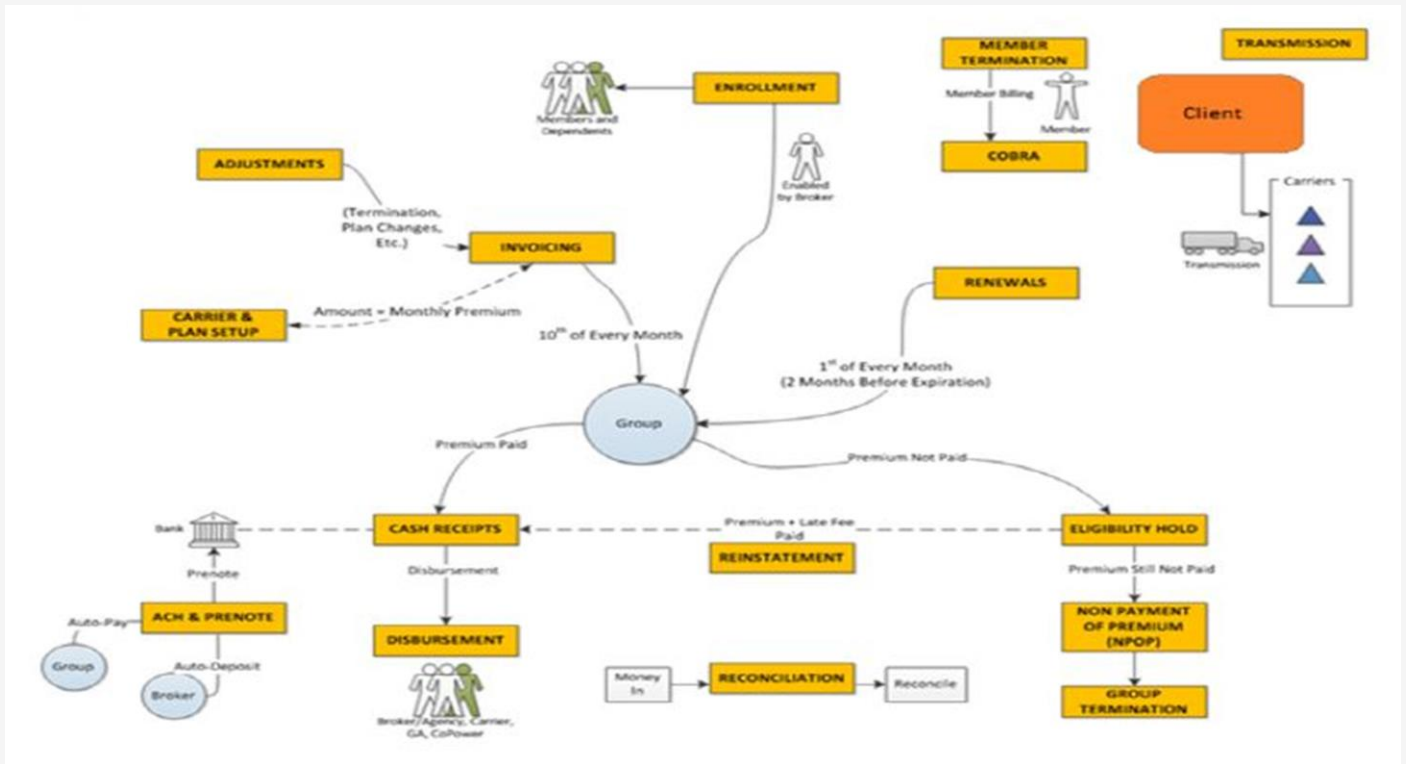

KEY CONTRIBUTIONS

- Xoriant used a blended delivery model that included on-site project manager, on-site business analyst, off shore developers and testers, and client team members
- Xoriant team, along with the client team, executed the project effectively using the Agile methodology
- Xoriant leveraged a cost-effective and efficient offshore delivery model

KEY BENEFITS

- Compare performances of networks and providers to use the information for better rate negotiations
- Define value drivers for members, their behaviour and choices driving value
- Take hold of analytical methods for assessing expected member value as well as actual performance
- Assess trends associated with cost drivers for patient care, including unusual ones that differ from expectations- as in the case of payers identify health conditions, providers and patient types unveiling a situation where costs remain lower than expected
