

Onboard the Future of Data Analytics in the era of AI

Winning with Fabric!

Custom Workshop and Pilot Investment Opportunity

Microsoft Fabric is an end-to-end, **unified** analytics platform, *bringing together* the data and analytics tools and technologies your organization needs. Empower your data and business professionals to unlock the potential of their data, and to lay the foundation for the **era of AI**.

Empower your Business with:

Unparalleled flexibility

- ▶ Personalization
- ▶ Supply Chain Optimization
- ▶ Marketing Automation
- ▶ Demand Forecasting

Extensive self-serve capabilities

- ▶ One AI-powered analytics platform
- ▶ One pool of compute for all Fabric workloads
- ▶ Reduce computing capacities cost

Responsibly connect people with built-in

- ▶ Security
- ▶ Governance
- ▶ compliance

Revamp the way your teams leverage data

Manufacturing: Unified Stream processing and IoT analytics to more effectively predict issues.

Healthcare: Integrated analysis of medical, genomic, claims and device data allows for breakthroughs in research, and remote patient monitoring.

Banking and Finance: Fraud detection, risk analysis, sales predictions, and compliance enhanced through real-time and historical analytics of operations and client data.

Retail: Comprehensive analytics for personalization, marketing automation, demand forecasting, and supply chain optimization.

3 Steps to Get Started – No Charge!

Ideation:

1 Industry-specific ideation session(s) with demonstration

Discovery:

2 Discovery workshop(s) covering your business and technical requirements

Deliverable:

3 Solution overview and proposal, including scope, technologies/architecture, term + cost to implement

After these 3 steps, if you would like to move forward with a production pilot, additional investment potentially available from Xoriant and Microsoft to help launch a quick start!

Xoriant is a Sunnyvale, CA headquartered digital engineering firm with offices in the USA, Europe, and Asia. From startups to Fortune 100, we enable innovation, accelerate time to market and ensure client competitiveness across industries. Across all our focus areas – digital product & platform engineering, experience design, data engineering and IoT – every solution we develop benefits from our product engineering DNA and culture of innovation. It also includes successful methodologies, framework components, and accelerators for rapidly solving critical client challenges. For 30 years and counting, we have taken great pride in the long-lasting, deep relationships we have with our clients.
